Detail-oriented Full Stack Developer with 2+ years of experience in designing, developing, and maintaining scalable web applications.

PROFESSIONAL SUMMARY

- Expertise in leveraging HTTP methods for seamless data exchange and implementing file uploads, ensuring robust backend functionality while also excelling in crafting responsive front-end designs.
- Extensive experience in crafting responsive web layouts using CSS Media Queries, Bootstrap, and Bulma, guaranteeing optimal user experiences across diverse devices and screen sizes.
- Proven track record in developing static, responsive, and dynamic websites, combining technical prowess with creative flair to deliver exceptional web solutions tailored to client needs.
- Fluent in Visual Studio Code, adept at harnessing its features and extensions to streamline the development process. Proficient in version control using GitHub and BitBucket, skilled in conflict resolution for seamless collaboration.
- Implemented comprehensive test suites using Jest and Jasmine to ensure robustness and reliability of front-end and back-end functionalities.
- Conducted thorough API testing with Postman, Jest, and Jasmine, ensuring seamless data exchange and functionality.
- Proficient in the Project Life Cycle, adept at utilizing project management tools like Jira and Clickup for efficient planning, execution, and delivery of projects.
- Possess strong collaborative skills, adaptable to team dynamics, and efficient in resolving conflicts. Known for contributing effectively to project success through teamwork and communication.

SKILLS

- Strong organizational and time-management,Exceptional communication and interpersonal skills
- Ability to work independently and as part of a team
- Detail-oriented and able to handle multiple tasks simultaneously
- **Front-end Technologies**: HTML, CSS, JavaScript, TypeScript, React,Angular,Ionic Framework
- **Back-end Technologies**: Node.js,Nest.js
- **Databases** : SQL(MySQL), NoSQL(MongoDB)
- **Version Control**:GitHub,BitBucket
- **Testion Tools**: Postman, Thunder Client
- **Project Mangagement**: Jira, Clickup
- **Other Tools and Technologie**s: Figma, Express, Fastify, Visual StudioCode, Bootstrap, Balma, Python, jQuery, MaterialUI, HighCharts, Lodash, Puppeteer, NPM, Cheerio, Axios, Redux, colors, chalk, Jest, Socket.io

EDUCATION

Vikas College of engineering and technology

Bachelor's Degree in Civil Engineering
2017 – 2020

PROFESSIONAL EXPERIENCE

Globalwave Softech Pvt Ltd, Hyderabad,Telangana —

Full Stack Developer

Project 1 : Clinic App
Client : Berea , USA
Technologies : React,Ionic,Angular,NestJs,Nodes,MongoDB,MySQL

Description: It offers an intuitive interface for streamlined appointment scheduling,telemedicine consultations, and secure access to medical records.With cross-platform compatibility, API integration, and advanced file upload functionality,it prioritizes user experience,performance, and data security, enhancing the efficiency of healthcare services.

Roles & Responsibilities:
- Spearheaded the integration of telemedicine functionalities, enabling virtual appointments and remote consultations for patients, thereby expanding access to healthcare services.
- Conducted performance analysis and implemented optimizations to enhance the app's speed and responsiveness, ensuring a seamless user experience, especially during peak usage times.
- Implemented secure user authentication and authorization mechanisms to ensure the confidentiality of patient data.
- Developed features enabling users to access and manage their medical records securely, with an emphasis on compliance with healthcare data privacy regulations.
- Facilitated collaboration between departments to gather requirements and ensure alignment with diverse stakeholder needs.
- Enhanced the Clinic API by incorporating advanced file upload functionality, allowing secure and efficient transfer of diverse medical data, including patient records, lab results, and medical images.
- Provided technical expertise and support to team members, fostering a collaborative and productive work environment.

Project 2 : Cool Guard App
Client : Kedro, UK
Technologies : NodeJs,ReactJs,Python,MongoDB

Description: Revolutionize your shopping experience with CoolGuard E-Commerce App. Discover the latest trends, shop securely, and enjoy personalized recommendations for a cutting-edge and effortless online shopping adventure.

Roles & Responsibilities:
- Crafted a user-friendly interface enabling effortless configuration and management of security settings for Cool Guard, enhancing user experience and accessibility.
- Designed and implemented an intuitive system for inventory management, enabling easy cataloging, tracking, and management of products. Additionally, developed streamlined order processing features for efficient order management.
- Leveraged technologies like React Native, Node.js, and MongoDB to ensure Cool Guard's seamless functionality across multiple platforms, providing a consistent and reliable experience for users.
